2025 **24th Summer School in International and Development Economics**, *Centro Studi Luca d'Agliano*

2026 **3rd Summer School in Experimental and Behavioral Economics**, *European Economic Review*

Awards, Fellowships, & Grants

2019 **Research poster competition: "The gap between reality and perceptions"**, ISTAT - ISLP *$ 2,000*

Ongoing research

Uncovering the Micro Drivers of Macro Trends in technology-rich Labor Markets
(provisional title)

with A. Galliera, S. Ghisolfi, F. Panebianco

- A theory of individual delegation between human and machine expertise, showing that automation is governed by comparative rather than absolute advantage, and that myopic agents systematically over-delegate by ignoring the future value of forgone human capital.

Human Capital in the Technological Era: a Theory of Expertise and Delegation

- A theoretical model and a lab experiment linking worker-level production under unequal technology access to firm-level compensation design, identifying the channels through which new technology compresses or widens wage differences.

Skills & Languages

Technical Skills: Stata; R; Python; LaTeX.

Languages: Italian (native); English (fluent); Portuguese (good); French (basic).
